

Malaise Identification and Care Monitoring Using Internet of Things

S. Karthik, K.S. Arun Kumar

Abstract

At current scenario Dengue fever is consider as a deadly malaise. The malaise usually is self-limiting but in some people can present with life-threatening complications such as Dengue Haemorrhagic Fever and Dengue Shock Syndrome. Dengue fever is wide spreading and Government has taken initiatives to control it. However in rural areas it is still required to create awareness and appoint doctors for regular check-ups.

Keywords: IoMT, malaise detection, dengue
