

GREEN CAMPUS POLICY OF SSMIET

Preamble:

Renowned for its dedication to sustainability, SSM Institute of Engineering and Technology has cultivated a stunningly beautiful campus. Elegant buildings meticulously maintained lawns, spacious sports grounds, and a flourishing green environment create a serene and stimulating learning environment for students.

1. RESTRICTED ENTRY OF AUTOMOBILES

Committed to reducing its environmental footprint and ensuring the safety of its community, SSMIET operates a robust fleet of 20 buses for students and staff. This eco-friendly initiative encourages everyone to reduce the use of their personal vehicles and opt for the college's transportation, promoting fuel conservation, minimizing air pollution, and fostering a cleaner campus environment.

2. USE OF BICYCLES/ BATTERY POWERED VEHICLES

With a vision for a sustainable future, SSMIET is spearheading a shift towards eco-friendly mobility. Their silent fleet of battery-powered vehicles gracefully glides through the campus, replacing noisy and polluting alternatives. Coupled with an emphasis on cycling, this initiative minimizes environmental impact while creating a healthier and more serene atmosphere for the entire community.

3. PEDESTRIAN FRIENDLY PATHWAYS

The vehicle parking space is provided at the main entrance of the college campus. As the campus is vehicle-free with some exceptions, the students and staff feel comfortable walking through the pedestrian-friendly pathways on both sides. The internal roads are lined with trees and LED lights, and they are properly maintained by the campus maintenance committee.

4. BAN ON USE OF PLASTIC

SSM Institute of Engineering and Technology is taking a bold stand against single-use plastics, paving the way for a greener future. Gone are the days of plastic bottles overflowing trash bins and plastic bags fluttering in the wind. Here, sustainability reigns supreme, with a complete ban on single-use plastic items like bottles, bags, spoons, straws, and cups.

5. LANDSCAPING WITH TREES AND PLANTS

SSM Institute of Engineering and technology's landscaping is pleasing to the eye and reflects an aesthetic sense. SSMIET's commitment to landscaping isn't just about aesthetics; it's about building a sustainable future. By prioritizing nature and nurturing a green campus, the institute sets a remarkable example for educational institutions around the world. It's a living testament to the belief that education thrives in harmony with nature, and that a healthy planet is the foundation for a thriving future.
