## CHILD MARRIAGE PROHIBITION

### REPORT

On 12.12.2022 (Monday) Mrs. S. Kausalya from Rediyar Chatrata Union office, Jhansi Rani - Admin OSC and Thavachelvi - OSC went to each class and explained in detail to the students about the problems caused by child marriage in our engineering college. This event started at 11.00 am. Around 190 students participated with great enthusiasm. Their explanation of Causes and Impact of Child Marriage are as follows :

Child marriage is no less than exploitation of right. In almost all places, the child must be 18 years and above to get married. Thus, marrying off the child before the age is exploiting their right. One of the most common causes of child marriage is the tradition which has been in practice for a long time. In many places, ever since a girl is born, they consider her to be someone else's property. Similarly, the elders wish to work out their family's expansion so they marry off the youngsters to characterize their status. Most importantly, poor people practice child marriage to get rid of their loans, taxes, dowry and more. The impact of child marriage can be life-changing for children, especially girls. The household responsibilities fall on the children. They are not mentally or physically ready for it, yet it falls on them. While people expect the minor boys to bear the financial responsibilities, the girls are expected to look after the house and family. Their freedom to learn and play is taken away. Further, their health is also put at risk due to the contraction of sexually transmitted diseases like HIV and more. Especially the girls who get pregnant at a young age, it becomes harmful for the mother as well as the baby.

At last the event finished at 01.00 pm with child marriage prohibition pledges from students.

Mr. M. Syed Abuthahir who took great pleasure in appreciating the volunteers, also cheered the students with his friendly speech. He encouraged the students to take a pledge along with him to keep the campus clean and green. Also, in his address said that the skill on first aid is very essential for the physical education teachers as there are sports related injuries occur in colleges and thanked for organizing the workshop. HE gave a crisp speech emphasizing the following points.

#### First aid

- The workshop sessions focused on the basics of first aid, and how to provide first aid in wounds, bleeding, musculoskeletal injury, burns, heatstroke, poisoning, bites, drowning, fainting, seizures and unconsciousness. All teachers had hands-on experience of dressing the wound, applying different types of bandages, splinting the injured body part, providing cardiopulmonary resuscitation, and transferring the victim.
- There was active participation by all the teachers and they expressed that the workshop will be very useful for them to meet the emergencies.

Dr. R. Rajavarman in his address said that psychological indicator, the importance and relationship between behaviors, thoughts and emotions, and awareness about disaster management and tricks to tackle disastrous situation.

#### Psychological Counseling

- Life skills where its meaning and significance were explained. The objective of this activity is to build resilience and reduce stress. Participants were asked to find a relaxed comfortable position and relax their body, after which they were instructed to inhale deeply through their nostrils, hold their breath for a Sec or two and to exhale through the mouth, while they exhale participants were also asked to stretch their hands assuming of letting go of their stress and tension. The objective of the activity was to help the participants know different physical & psychological indicators while expressing emotions, and also to help them understand the importance and relationship between behaviors, thoughts and emotions.

Dr. D. SENTHIL KUMARAN, M.E., Ph.D., (NUS)  
Principal

Poonam Road, Dindigul - 624 002

- The seven Fundamental Principles – humanity, impartiality, neutrality, independence, voluntary service, unity and universality – are the most important of these tools. They serve both as an inspiration – an ideal to strive for – and as practical steps to take to achieve that ideal in times of peace, armed conflict or natural disaster. They call on us to help those most in need first, regardless of their political affiliation, race or religion, and they make this possible by providing guidance on gaining the trust of people in all these circumstances.
- When the principles are understood and followed, Movement volunteers and staff generally find that people let them carry out their work to help those in need, even during conflict.
- The Fundamental Principles are also an expression of the values and ideals around which the Movement is united. Above all, the Principles are a call to action for Movement volunteers and staff, compelling us – as the Principle of humanity describes – to “prevent and alleviate human suffering wherever it may be found”.

Road safety is a safety measure to reduce the risk of road accidents and road side injury because of the mistakes of people while driving on the road. We cannot count the daily road side accidents and death of people because of the driving mistakes and lack of road traffic rules followers. Every person going on the road has risk of injury or death. Everyone needs to be well aware of the road traffic rules especially children and young people who are at significant road accident risks. It is found that most of the hospitalization cases and leading cause of death are because of the road trauma. Road accidents are very necessary while being on the road and must know by all because road accidents are the leading cause of death. Everyone should learn the road traffic and safety rules at a very early age to perform safer behaviours in the later life.

- To create awareness on road safety among students and faculties. • To understand the importance of a road safety and make aware about the importance of their and others life.
- To motivate the students and faculties to follow road safety.
