Up-Rev Prior Attendance Reports:

This allows you to update your old Attendance reports to the latest version of the HTML file. This will fix a number of issues and errors in the earlier versions of the reports.

- Click the 'Choose files' button below and then navigate to the location where your old attendance reports are located.
- By default, the attenance reports are saved to your 'Downloads' directory but you can (and probably should) move them to a more permanent location.

The updated files will get saved once again to your 'Downloads' directory.

- Browser security dictates that the files can only be written to that directory... I cannot automatically save them elsewhere.
- NB you can update several files at once using the <shift> and/or <otrl> keys to select multiple files (but you will likely have to click 'Allow' in a system dialog before the updated reports are download).
